

## GLOSS PLATES

CAN BE  
CUSTOMIZED

5721-LGU

5721-MGU

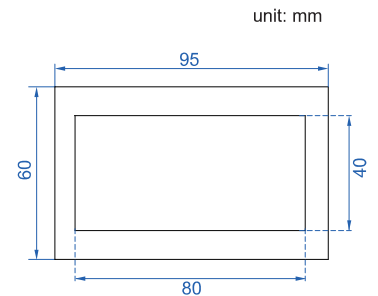

5721-HGU

- Used to calibrate work gloss meters
- High gloss plates are made of polished black glass or other materials, medium and low gloss plates are ceramic

### SPECIFICATION

Code	5721-LGU	5721-MGU	5721-HGU
Gloss range (60°)	low gloss (<30GU)	medium gloss (30~70GU)	high gloss (>70GU)
Incidence angle*	60°		
Flatness (black glass plate)	interference aperture $\leq 15$ , partial aperture $\leq 3$		
Spectrum reflection neutral error (ceramic plate)	$\pm 12\%$		
Annual variation	$\pm 1\text{GU}$		
Working environment	temperature 5~45°C, relative humidity <85%RH		
Working surface dimension	80×40mm		
Net weight	according to different materials		

\* Gloss values at different incidence angles (20°, 45°, 60°, 75°, 85°) are available according to customer requirements
